

Public Disclosure About the University of Oregon BLA and MLA Degrees

Average ranges of additional costs of attendance beyond those published on the UO website:

Art and drafting supplies = \$240 - \$700 per year.

[Most design work is now digital, and mainly so in more advanced classes.]

[Some students choose to sketch, draw or render many studio products by hand, which adds to these costs.]

Printing of drawings and posters for display at reviews and class pinups = \$350 - \$1,600 per year.

[Digitally produced graphics are sometimes printed for class or public events. Digitally projected displays are often used instead.]

[Some students choose to print digitally produced in-process and draft drawings often, which adds to costs.]

A high-powered laptop computer with lots of RAM and VRAM, a fast graphics card, and maximum drive storage = \$3,400 to \$5,600

[Design work requires a powerful graphics computer because CAD, GIS, image, and 3D graphics files are often very large.]

[Many students find that a large external monitor for home and/or studio is also very useful = \$200 to \$1,000.]
